Participate at **Intra University Programming Contest, 2015** held at Stamford University.

Project Profile

Automatic Question Generator (Question Bank)
- **Project Details:**

Question Bank System project is aimed to develop an automatic question making system. This system generates question randomly from database. The question paper has total 4 sets & every set contains 10 marks. As our examination system in Stamford. Question bank is basically a storage of numerous questions which has been used by the teacher to set the question paper or by the learner to get an idea of question types those are being set on any individual subject examination. This project is faculty member oriented based, where only the teachers can set questions by using this system. Moreover, this question paper format is based on the examination system of Stamford University Bangladesh, so that, the generated question paper is as the format of Mid/Final examination paper of Stamford University Bangladesh CSE Faculty. That is, total four sets of questions, each set carries ten marks. To use this automatic question generator system, one faculty has to register first and get approval by the admin. The admin and faculty members can add more questions in any specific subject/course. The courses are being added by the admin. The questions are generated randomly based on the storage of questionnaires of the respective course. After question generation user can download the PDF format of the question and get a print of it.
